ABOUT INTECO PTI

EXTEND YOUR EQUIPMENT'S LIFESPAN

Thanks to our expertise in the steelmaking industry, INTECO PTI adheres to a rigorous quality standard for repair services. Our goal is to identify the root cause of failures. If the damage deviates from the norm, our engineers collaborate with you to pinpoint issues in your process. Each refurbished part is accompanied by a detailed technical report outlining the service performed.

On-site repair services: Bringing expertise to you

When you need additional assistance, INTECO PTI can dispatch qualified engineers or technicians to address on-site issues.

WHO WE ARE...

As a member of the INTECO Group since 2013, we contribute 30 years of expertise to an international successful group with a leadership in metallurgical process technology and equipment for melting, refining, casting, remelting and atomization for high performance steels, superalloys and titanium. Our dedicated team of qualified engineers, metallurgists and technical support staff with subsidiaries in Europe and Shanghai ensure global customer satisfaction.

WHAT WE DO...

Our core competencies within the group lie in high-tech applications, particularly chemical energy systems for electric arc furnaces, including oxy-fuel burners, material injection systems as well as control and automation systems, pre-heating and drying combustion systems to enhance efficiency, productivity and safety. We offer full-service combustion and injection solutions, including design, engineering, manufacturing, testing, commissioning, training and process optimization. Our local warehouse has a good stock of critical spare parts inventory.

WHAT WE AIM FOR...

Always eager to further develop our products and serve you – our valued customer – with the best equipment possible, we conduct research and submit patents for our innovative and tailor-made solutions.

Repairs and spare parts

- › High-tech applications, particularly chemical energy systems for electric arc furnaces
- › Oxy-fuel burners
- › Material injection systems
- › Control and automation systems
- › Preheating and drying combustion systems
- › Design, engineering, manufacturing, testing, commissioning, training and process optimization
- › Local warehouse with critical spare parts inventory

Our Technology – Your Advantage

- › Repair guarantee for everything manufactured by INTECO PTI
- › JetBOx™ and JetBurner™ repaired and refurbished with PTI OEM parts
- › Complete spare parts inventory
- › Worldwide fast shipping
- › On-site troubleshooting and repair service available
- › Expedited service available

Data analysis

We keep rigorous traceability of the clients equipment to analyze and prevent failure during operation or performance drops.
